

Most Important & Frequently Repeated Questions in MEFA (Managerial Economics & Financial Accounting) for RTU Board

Based on the analysis of recent RTU (Rajasthan Technical University) board papers from 2022, 2023, and 2024, here is a consolidated list of the most important and frequently repeated questions in MEFA. These questions are highly valuable for students aiming to score high marks and are drawn from actual board papers, focusing on both theory and problem-solving aspects^{[1] [2] [3]}.

PART-A: Short Answer Type (2 Marks Each)

These are direct, definition-based or conceptual questions that appear almost every year:

- What do you mean by managerial economics?
- How is disposable income different from personal income?
- What are the determinants of supply?
- What does the shape of an isoquant show?
- What does opportunity cost mean?
- Write down the steps of operating cycle.
- What do you mean by double entry accounting system?
- What does break-even point mean?
- Why is there a problem of scarcity and choice in economics?
- What do you mean by income demand?^{[1] [3]}

PART-B: Analytical/Problem Solving (4 Marks Each)

These questions require brief explanations, diagrams, or small calculations and are regularly repeated:

- Explain any one method of measuring National Income.
- Explain the concept of elasticity of demand.
- Write short note on least cost combination of inputs.
- Discuss the relations between Average Cost and Marginal Cost of a firm.
- Using suitable diagram, explain the kinked demand curve under Oligopoly.
- Discuss the various steps in accounting process.
- Explain the concept of ratio analysis.^{[1] [2] [3]}

PART-C: Descriptive/Analytical/Problem Solving (10 Marks Each)

These are long-answer questions, often requiring detailed explanations, diagrams, or calculations. They are among the most repeated and important:

- What is demand forecasting? Discuss the qualitative and quantitative methods of demand forecasting.
- Explain the various types of cost with the help of suitable diagrams.
- Explain the price and output determination under monopoly.
- Discuss the main information given in balance sheet and profit and loss account.
- Critically examine the various methods of evaluation of capital budgeting proposals. ^[1] ^[2] ^[3]

Additional Frequently Repeated & Must-Prepare Topics

Economics Section

- Circular flow of economic activity (especially 3-sector and 4-sector models).
- National Income: Definitions, concepts (GDP, NNP, GNP), and measurement methods.
- Law of Demand and its determinants.
- Types of elasticity of demand (price, income, cross elasticity).
- Production function: Law of variable proportions, returns to scale, stages of production.
- Isoquants and isocosts, least cost combination.
- Cost concepts: Types of costs (fixed, variable, average, marginal, opportunity cost).
- Market structures: Perfect competition, monopoly, monopolistic competition, oligopoly (with diagrams).
- Kinked demand curve in oligopoly and price rigidity.
- Scarcity and choice problems.
- Difference between explicit and implicit cost.
- Features of monopoly and monopolistic competition.
- Demand forecasting methods.

Financial Accounting Section

- Double entry system, accounting principles.
- Steps of accounting process.
- Preparation of trading, profit & loss account, and balance sheet (with given data).
- Fund flow and cash flow analysis.
- Ratio analysis: types and significance.
- Break-even analysis: calculation and graphical representation.

- Capital budgeting: methods for evaluating proposals (NPV, IRR, Payback, etc.).
- Operating cycle steps.
- Difference between fund flow and cash flow statements.
- Importance and uses of balance sheet.
- Depreciation methods.
- Journal, ledger, trial balance, and their significance.
- Calculation of funds from operations (with given P&L data).

Questions That Appear Repeatedly Across Years

Topic/Question	Years Appeared (Sample)
Methods of measuring National Income	2022, 2023, 2024
Types of elasticity of demand (with graphs)	2022, 2023, 2024
Law of variable proportions/returns to scale	2022, 2023, 2024
Kinked demand curve under oligopoly	2022, 2023, 2024
Price and output determination under monopoly	2022, 2023, 2024
Cost concepts and types of costs	2022, 2023, 2024
Break-even analysis and calculation	2022, 2023, 2024
Preparation of profit & loss account and balance sheet	2022, 2023, 2024
Capital budgeting methods (NPV, IRR, payback)	2022, 2023, 2024
Ratio analysis	2022, 2023, 2024
Demand forecasting: qualitative and quantitative methods	2022, 2023, 2024
Fund flow/cash flow analysis	2022, 2023, 2024

Tips for Scoring High in RTU MEFA Exam

- **Prepare all definitions and short notes** from Part-A thoroughly.
- **Focus on diagrams** (cost curves, demand/supply curves, kinked demand, etc.) and practice drawing them neatly.
- **Practice numerical problems** on break-even analysis, ratio analysis, NPV, and preparation of accounts.
- **Write structured answers** for long questions: Introduction, Explanation (with diagrams/examples), and Conclusion.
- **Revise previous years' papers**—many questions are repeated with minor changes in wording.

Summary Table of Most Important Questions

Section	Question/Topic	Type
Economics	Methods of measuring National Income	Theory
Economics	Types of elasticity of demand (with graphs)	Theory
Economics	Law of variable proportions/returns to scale	Theory
Economics	Kinked demand curve under oligopoly	Diagram
Economics	Price and output determination under monopoly	Diagram
Economics	Cost concepts and types of costs	Theory
Economics	Demand forecasting methods	Theory
Financial Accounting	Break-even analysis and calculation	Numerical
Financial Accounting	Preparation of profit & loss account and balance sheet	Numerical
Financial Accounting	Capital budgeting methods (NPV, IRR, payback)	Numerical
Financial Accounting	Ratio analysis	Numerical
Financial Accounting	Fund flow/cash flow analysis	Theory

Prepare these questions thoroughly, practice writing answers and diagrams, and you will be well-equipped to score high marks in MEFA for RTU board exams. [\[1\]](#) [\[2\]](#) [\[3\]](#)
